

PROL:GNER

Simply Moving Smiles

For The **BEST**
Version of **YOU**

PROLIGNER Clear aligners will straighten your teeth with minimal fuss and without anyone even noticing.

Your perfect new smile will simply move into place, one clear aligner at a time, bringing out the best form of you as it does.

By your last aligner, you won't just see the difference, you'll feel it too - along with everyone else.

Are you ready to begin?

The Clearest Choice In The Industry

- ✓ Virtually Invisible
- ✓ Private healthcare rebates
- ✓ Maintain your lifestyle
- ✓ Easily removable
- ✓ More comfortable than braces
- ✓ Fewer dental appointments
- ✓ Better oral health
- ✓ Keep eating your favourite foods

Discover the Benefits of Clear Aligners

Nearly Invisible

Get straight teeth without anyone noticing

Removable

Easy to remove, take them out whenever required

Comfortable

Made to measure, aligners fit your teeth exactly so you hardly notice them

Convenient

Clear aligners require less visits to the dentist

Step 1

Get Assessed

Get assessed by a dental professional and see if you are a candidate. They will take a 3D scan of your teeth and make you a tailored plan.

Step 2

See your future smile

See what your new smile will look like in 3D before you begin your treatment

Step 3

Get Straight Teeth

Your dentist fits your aligners. Then unlike braces, you change each set of aligners yourself as directed by your dentist, only visiting your dentist when they think you need to!

How to Wear your Aligners

Wear

Wear your aligners for a minimum of 22hrs a day.

Rinse

Clean your aligners between each wear.

Remove

Remove your aligners to eat and drink.

Clean

Brush your teeth before you put your aligners back in.

Change

Every 1 - 2 week you change your aligners to a new set.

The Clearest Choice In The Industry

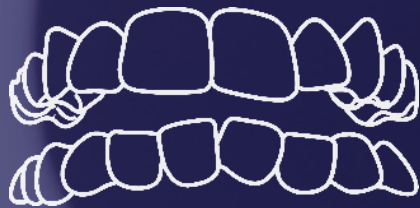

- ✓ Orthodontist-led Planning
- ✓ Fast Turnaround Times
- ✓ SuperClear FLX & SuperClear PRO
- ✓ Superior Performance & Clarity
- ✓ Cost Effective

- ✓ Warm Responsive Service

TREAT A WIDE RANGE OF CONDITIONS

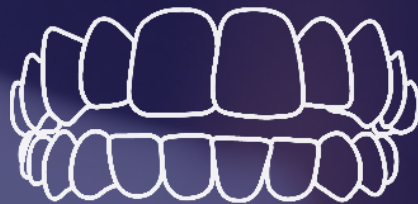

CROWDING

There are too many teeth to fit the space in the jaw causing misalignment

OPEN BITE

Your upper and lower teeth don't touch when your mouth is closed

CROSS BITE

When a tooth from the upper arch is positioned inside the lower arch

UNDER BITE

Lower Teeth protrude in front of the upper teeth

OVER BITE

Overlapping of the lower teeth by the upper teeth

GAPS / SPACES

When there is too much space or gaps between teeth

PROL:GNER

SuperClear FLX

Elastometric dual shell technology gives extra strength and flexibility

SuperClear PRO

PETG technology engineered for an ultra clear finish

Vari-Trim™ Protocol

varies the aligner trim line to apply extra force when it is needed

Laser Marking

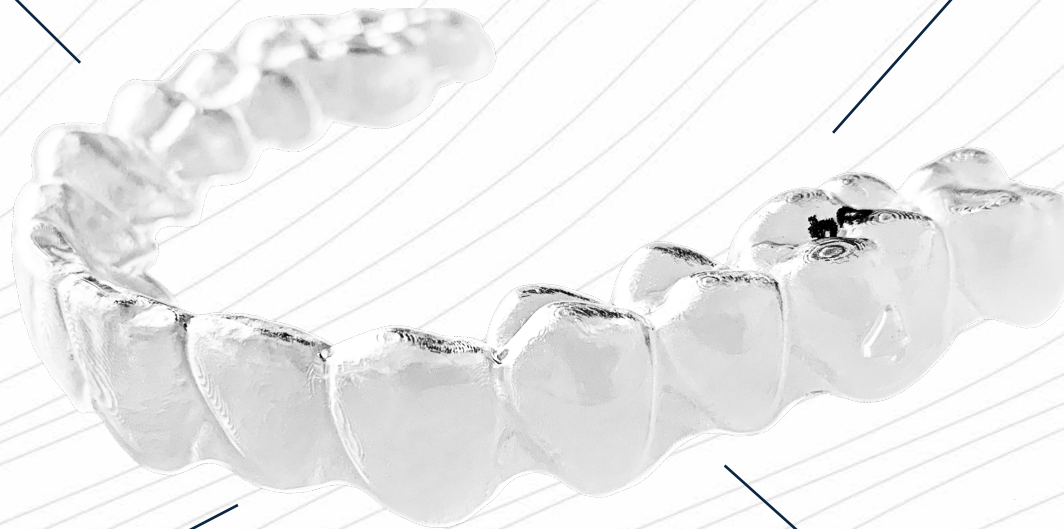

clearer tracking of aligners

Maximum Comfort

digitally scalloped trim lines as standard trimmed and polished for maximum comfort

Stain & Crack Resistant

aligners stay clearer and last longer

Technologically Advanced

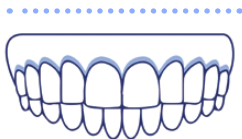

Your dentist can take impressions with the newest technology so you don't have to take impressions with uncomfortable impression materials.

Comfortable Trim Lines

PROLIGNER clear aligners are shaped to fit your teeth and not put pressure on your gums. This makes PROLIGNER aligners smaller and more comfortable.

SCALLOPED TRIM LINE
(STANDARD)

3D Treatment Plans

See your new smile come to life before you ever wear an aligner. With our 3D treatment plans you can see your smile come to life from every angle. You will get one sent to you before you even go back to the dentist.

Manufacturing Without Compromise

Our treatment plans are created by Orthodontists, and our aligners are CE marked, TGA and FDA approved, and manufacturing complies with ISO 13485:2016. We also abide by the highest COVID-19 compliance.

GET ASSESSED

Your dentist assess your teeth, takes some impressions and photos.

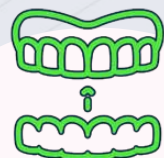

APPROVAL / MODIFY

Review the 3D plan and make any modifications

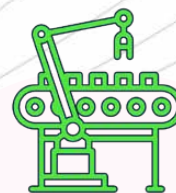

DISINFECT & PACK

COVID-19 safe - aligners are disinfected and sealed in pouches

TREATMENT PLANNING

Your dentists creates a 3D treatment plan and sends it to you.

MANUFACTURE

Your custom aligners are manufactured using 3D printing technology to get the closest fit possible

DELIVERED TO YOU

Get your aligners fitted by your dentist and get started!
